

Synthetic organisation of the post-2020 Global biodiversity draft framework (February 2022) with the four main goals and 21 associated targets, and a summary of the analysis of the relevance of goals, targets and indicators

		Target relevance	Indicators relevance
STRATEGIC GOAL A "Conservation" (Maintain and restore biodiversity and the ecosystems) Goal relevance: average Indicators relevance: average	T1 Spatial planning	good	average
	T2 Restoration	average	good
	T3 Protected areas	average	good
	T4 Wild and domestic populations	average	low
	T5 Use of wild species	good	average
	T6 Invasive alien species	average	average
	T7 Pollution	good	average
	T8 Climate change	low	low
STRATEGIC GOAL B "Use" (Stop the decline in nature's contributions to people) Goal relevance: good Indicators relevance: average	T9 Material services	average	low
	T10 Agriculture	average	average
	T11 Regulating services	good	good
	T12 Cities	good	average
STRATEGIC GOAL C Goal relevance: average Indicators relevance: low "Equitable sharing" (Ensure fair and equitable access to natural resources)	T13 Access and fair and equitable benefit sharing	good	low
STRATEGIC GOAL D "Implementation" (Deploy sustainable tools and solutions) Goal relevance: good Indicators relevance: good	T14 Political mainstreaming	good	low
	T15 Mainstreaming in businesses	average	low
	T16 Mainstreaming by citizen	good	good
	T17 Biotechnologies	average	average
	T18 Harmful subsidies	good	good
	T19 Resource mobilization	average	average
	T20 Knowledge	good	average
	T21 Equitable participation and human rights	good	good
